Subject: RE: CRU full gamma

Mike,

Thanks for putting this together. I don't like how it looks with all of the data on one figure. I will include the figures I have from the past reports (including the ERT figure) for the RSE. Thanks for your efforts always.

Subject: CRU full gamma

Dan,

See attached for the full gamma figure we discussed for CRU. So as you thought, surveys were done in different units (cpm/kcpm and ur/hr). Looks like there is some overlap between the surveys as well. I looked through all the GIS stuff we have and this is all I could find. Obviously there have been a lot of TDs at this point, and surveys were done by different groups so it's definitely possible I missed something. If there is a survey that was performed that isn't captured here, let me know and we can try to figure it out. The only one that is definitely not on here is the survey we did September 2019 at Tesla; ERT did the figure for that event and I believe I only have the pdf (attached). So I'd have to reach out to Hoppe to see if we could get the data. The only other thing I found that might be useful was a layer consisting of aerial flyover data. I didn't include it here because that seemed too messy but figured I'd mention that we have it. Take a look and let me know what you think.

Thanks!
Mike L
